Introducing the NHS COVID-19 app

Introduction

The new NHS COVID-19 **app** will help to control the spread of **Coronavirus**.

An **app** is a programme that you have on your phone to help you do something.

Coronavirus is a new illness that is spreading around the world.

It affects your lungs and breathing.

The new app

The new app will help you to:

- find out if there are lots of people with Coronavirus in your area
- get a test for Coronavirus if you think you might have it

- check in to places that you visit, so that you can find out if people there at the same time, have Coronavirus

- find out if you have been close to others who have Coronavirus

If you have been close to someone who has the app and tests positive for Coronavirus, the app will tell you what to do to keep yourself and other people safe.

Keeping your information private

The app works on your phone as you move around.

It does not use any information about you, like your name or address.

No one will know who you are or where you live.

Download the app

The NHS COVID-19 app is the fastest way to keep yourself and other people safe from Coronavirus.

Download the app to your phone today.

Start using the app and help to stop the spread of Coronavirus.
